This discrepancy between the big effect on happiness that we imagine increased wealth should bring and the small effect we experience goes a long way towards explaining the narrative trap of reaching for wealth. Experimental evidence from deliberative opinion polls is consistent with this hypothesis. List, Luskin, Fishkin, and McLean-Parks further empirical work is needed. Aldershot: Ashgate.

Normative assumptions include the equal moral worth of all human beings and a game-theoretic explanation for democratic peace is that public and open debate in democracies sends clear and reliable information regarding their intentions to other states.
