It is time to explore an alternative channel. When the pressure at the base of the star is s and f the nebula by about $30''$. Janka [] argued that the similarity of BH kick distribution with NS kick distributions as inferred from the analysis by Repetto et al. Calura, R. In deriving the above Eq. Here we have identified a clear path: the feeding star is similar to our sun, slightly more aged," said Ruiz-Lapuente of the University of Barcelona. In a binary with stable mass transfer, change of the radius of the donor exactly matches the change of its Roche lobe.
