Tsunamis are some of the most devastating natural disasters. Salted-over soil becomes sterile, and it is difficult and costly to restore for agriculture.

To get an idea of the scale of the damage this year, we looked at five of the most powerful earthquakes in the world, according to BBC World Service. This energy is equivalent to over 1, times that of the Hiroshima atomic bomb but less than that of Tsar Bomba the largest nuclear weapon ever detonated; however, the total physical work done M W and thus energy by the quake was 4. In the aftermath of the Lombok earthquake, for instance, foreign nongovernmental organizations were told they were not needed.

The devastating tsunami that smashed through villages and beach resorts also destroyed villages in the state of Andhra Pradesh were destroyed. Photo: Many buildings, including this mosque in Palu, were destroyed by the tsunami.
